

AMENDMENTS TO THE CLAIMS

Listing of claims:

This listing of claims replaces all prior versions and listings of claims in the application.

1. (Currently Amended) An ~~adhesive-type~~ adhesive optical film comprising:

[[an]] a first optical film; [[and]]

[[an]] a first adhesive layer laminated on at least one side of the first optical film[[,]];

and

at least one layer, selected from a release film and a second optical film,

the at least one layer being provided on a surface on the side opposite to a first surface of the first adhesive layer where the first optical film is provided,

wherein at least a portion of an edge of the first adhesive layer is an inside edge that is located on the inside of an edge line of the first optical film and the inside of an edge line of the least one layer selected from the release film and the second optical file.

2. (Currently Amended) [[An]] The ~~adhesive-type~~ adhesive optical film according to claim 1, which further comprising at least one layer selected from a ~~release film, an optical layer,~~ a second optical film and a second adhesive layer.

3. (Currently Amended) ~~[[An]] The adhesive-type~~ adhesive optical film according to claim 1, wherein a portion of the inside edge in cross section extends to the vicinity of the edge line of the first optical film.

4. (Currently Amended) ~~[[An]] The adhesive-type~~ adhesive optical film according to claim 3, wherein the inside edge has a concave edge.

5. (Currently Amended) ~~[[An]] The adhesive-type~~ adhesive optical film according to claim 3, wherein the inside edge has a convex edge.

6. (Currently Amended) ~~[[An]] The adhesive-type~~ adhesive optical film according to claim 1, wherein the inside edge is formed on at least one-half of the total perimeter of the first adhesive layer.

7. (Currently Amended) ~~[[An]] The adhesive-type~~ adhesive optical film according to claim 1, wherein the inside edge is formed on the whole of the edge line of the first adhesive layer.

8. (Currently Amended) ~~[[An]] The adhesive-type~~ adhesive optical film according to claim 1, wherein a distance between the inside edge and the edge line of the first optical film is from 10 to 300 μm .

9. (Currently Amended) ~~[[A]]~~ The image display device comprising the ~~adhesive-type~~
adhesive optical film according to claim 1.

10. (Withdrawn) A method for producing an adhesive-type optical film comprising:
forming an adhesive layer on an optical film;
applying a pressure to the adhesive layer from both sides thereof to extrude part of the
adhesive layer from an edge of a side surface of the optical film;
shaving or cutting a side surface of the adhesive layer; and
releasing the pressure to the adhesive layer.

11. (Withdrawn) A method for producing an adhesive-type optical film according to
claim 10,
wherein the adhesive layer comprises an adhesive having an storage modulus at 25°C
determined from a dynamic viscoelasticity is from 1.0×10^4 to 1.0×10^7 Pa.

12. (Withdrawn) A method for producing an adhesive-type optical film according to
claim 10,
wherein the step of releasing the pressure on the adhesive layer comprises pulling the
adhesive layer outward in a thickness direction of the adhesive layer.

13. (Withdrawn) A method for producing an adhesive-type optical film according to claim 10,

wherein the optical film is shaved or cut together with the adhesive layer in the step of shaving or cutting a side face of the adhesive layer.

14. (Currently Amended) [[An]] The ~~adhesive-type~~ adhesive optical film according to claim 1, wherein the inside edge has a concave edge.

15. (Currently Amended) [[An]] The ~~adhesive-type~~ adhesive optical film according to claim 1, wherein the inside edge has a convex edge.

16. (Withdrawn) A method for producing an ~~adhesive-type~~ adhesive optical film comprising:

sandwiching an adhesive layer between optical films; and
pulling the adhesive layer outward in a thickness direction of the adhesive layer.
